

# Cesar Delgadillo

Desenvolvedor Front-end

## Contacts:

**Phone/WhatsApp:** (65) 9 8401-0887

**Email:** [cadp.webmaster@gmail.com](mailto:cadp.webmaster@gmail.com)

**Linkedin:** [www.linkedin.com/in/cesardelgadillo](https://www.linkedin.com/in/cesardelgadillo)

## Technical Skills

- **Languages:** HTML5, CSS3, JavaScript, TypeScript
- **Frameworks & Tools:** Angular, Node.js, MongoDB, MySQL, Ionic
- **Styling:** Tailwind CSS, Angular Material, Bootstrap
- **DevOps & Integration:** REST APIs, CI/CD, Docker
- **UI/UX:** Figma, Responsive Web Design
- **Design Tools:** Adobe Photoshop, Illustrator
- **Version Control:** Git, GitHub, GitLab
- **Agile:** Scrum, Kanban

## Professional Profile

**Senior Front-end Developer • Full-Stack Experience • 10+ Years in Web Development**

Hello! I'm Cesar Delgadillo, a Senior Front-end Developer and Web Project Manager with over 10 years of experience delivering scalable and high-performance digital solutions for web and mobile platforms.

I started my career as a graphic and web designer, building a solid foundation in visual design, UI/UX principles, and tools like Adobe Photoshop and Illustrator. This background greatly influences how I approach front-end development, always aiming for user-centered, visually refined, and functional interfaces.

I specialize in developing modern single-page applications (SPAs) using Angular, TypeScript, and RxJS, with practical experience in state management using NgRx and building scalable front-end architectures. I'm skilled in integrating RESTful APIs, implementing unit testing with Jasmine and Karma, and working with modern build tools like Webpack for performance optimization. I have strong proficiency in HTML5, CSS3, and component libraries like Tailwind CSS, Bootstrap, and Angular Material.

I also develop hybrid mobile apps using Ionic and Angular, focusing on cross-platform performance and user experience.

Currently, I lead the web development team at Simplifica Mídias, managing the full project lifecycle — from client planning and front-end implementation to API integration and full-stack delivery using Node.js.

In parallel, I also develop content-driven websites and portals using Joomla CMS, creating flexible and scalable solutions for clients across different sectors.

I'm fluent in Portuguese and Spanish, with advanced proficiency in English. I'm open to remote opportunities (full-time or freelance) with teams in North America, Europe, or other global markets.

## Experiência:

### Front-end Developer & Web Project Manager Simplifica Mídias (jan 2020– present)

- Lead the front-end team and manage a diverse portfolio of responsive websites, mobile apps, and custom platforms.
- Conduct client meetings to gather requirements, define scope, plan architecture, and establish timelines.
- Developed complex SPA projects using Angular, TypeScript, and state management with NgRx for scalable enterprise applications.
- Integrated RESTful APIs with Angular HttpClient and implemented RxJS Observables for reactive data flows.
- Configured modern build tools such as Webpack and Nx for monorepo architectures, ensuring optimized performance and maintainability.
- Created unit and integration tests with Jasmine/Karma to ensure code quality and reduce regressions.
- Develop accessible, responsive web interfaces using Angular, HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, Bootstrap, and Angular Material.
- Develop and integrate REST APIs with Node.js and MongoDB, contributing to backend logic and data modeling.
- Build CMS-based solutions with Joomla (PHP & MySQL), customizing templates and components for dynamic content.
- Ensure code quality, performance, and adherence to accessibility standards (WCAG).
- Mentor junior developers and implement Agile methodologies across all web projects.

### Co-founder & Front-end Developer Une Mídias (feb 2015 – dec 2019)

- Co-founded a digital agency focused on building custom websites, mobile apps, and web systems for small to mid-sized businesses
- Delivered responsive front-end solutions using HTML, CSS, JavaScript, TypeScript, Angular and Bootstrap, tailored to each client's needs
- Developed and maintained dynamic websites using Joomla CMS, with advanced customization in PHP and MySQL
- Led client discovery sessions and translated business needs into scalable technical solutions
- Coordinated multidisciplinary teams, including mobile developers and UI/UX designers, ensuring on-time and successful deliveries
- Provided long-term client support, hosting guidance, and continuous updates to boost client retention and satisfaction

### Web designer Tecnomapas (jun 2012 – apr 2015)

- Developed responsive front-end interfaces for geotechnology systems using HTML5, CSS3, Angular, Bootstrap, and jQuery.
- Delivered UI templates for backend developers in enterprise applications.
- Maintained and updated the institutional website and internal portals, ensuring performance and cross-browser compatibility.
- Built and supported internal systems focused on usability and clean code.
- Designed visual interfaces and UI templates for offline desktop apps using Windows Forms and WPF (XAML).

### **Web Designer**

**SEMA MT – State Department of Environment (jun de 2014 – mar de 2015)**

- Maintained and updated the public and internal (intranet) portals of the department.
- Implemented new features and usability improvements in CMS-based systems.
- Managed publication and editing of institutional content and news.
- Designed banners, visual assets, and event communication materials.
- Provided technical support for portal users and content managers.

### **Graphic Designer**

**Motiva Placas e Adesivos (ago de 2004– jun de 2012)**

- Created layouts and printed materials, handling prepress and final art.
- Operated vinyl cutters and large-format printers for signage and promotional materials.
- Executed graphic production processes such as screen printing and vinyl application.
- Managed the full print production cycle from design to delivery.
- Used CorelDRAW, Adobe Illustrator, and Photoshop for impactful graphic design.

### **Languages:**

- Portuguese – Native
- Spanish – Fluent
- English – Advanced
